

Waterfall Card

A5 Card

Template:

Four squares - to hold images

1 long strip - to hold squares and will form the waterfall

1 short banner - to hold main strip in place

Instructions:

1. Cut out all of the templates and draw around them on your chosen card.
2. Mark and score along the dotted lines and make a hole where indicated at the top of the main strip. This will form the main mechanism for the waterfall.
3. Decorate each of the four squares.
4. Attach each square onto the main piece (at the top only), just under the scored lines. The squares will overlap each other so it is suggested you start at the bottom and work upwards.
5. Fold the main strip backwards in half at the point of the top fold so the images are facing.
6. Place the folded strip onto the front of your chosen card (card size dependant on how many squares used).
7. Fix the edges of the small banner across the folded strip (back fold only). This will allow the strip to move up and down freely but will prevent it falling off the card.
8. Place ribbons or threads through the hole at the bottom of the main strip for decoration.
